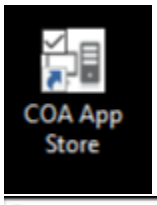
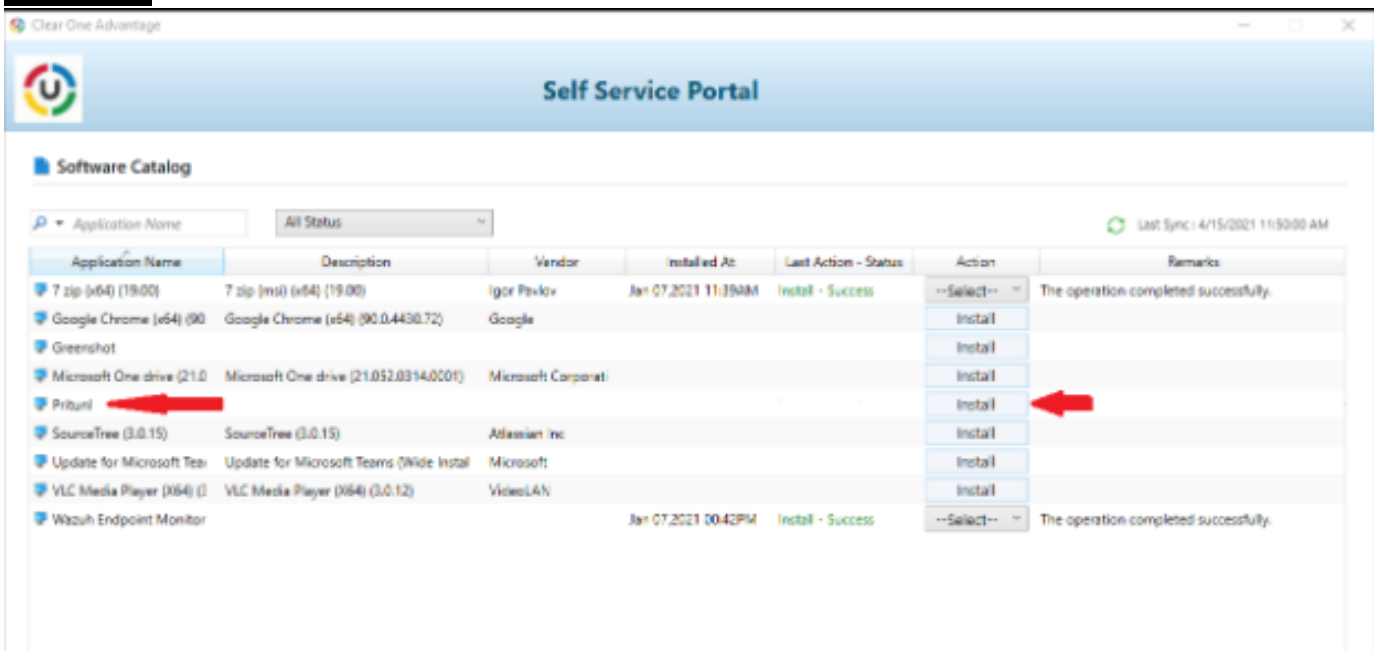
Setting up Pritunl VPN

This can only be completed once you are fully signed into your new computer.

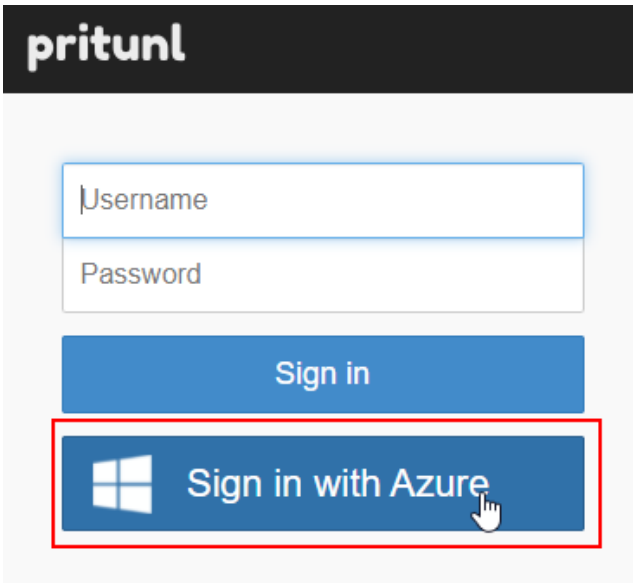
1. Install Pritunl by opening COA app store and selecting install. (If you do not see the COA App Store populate after some time please let us know by emailing helpsesk@clearoneadvantage.com)



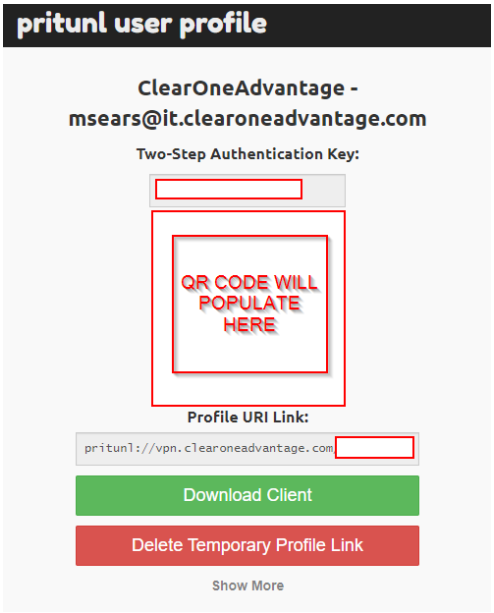


Please note: If you see that Pritunl has failed to install please disregard, the app will still be downloaded.

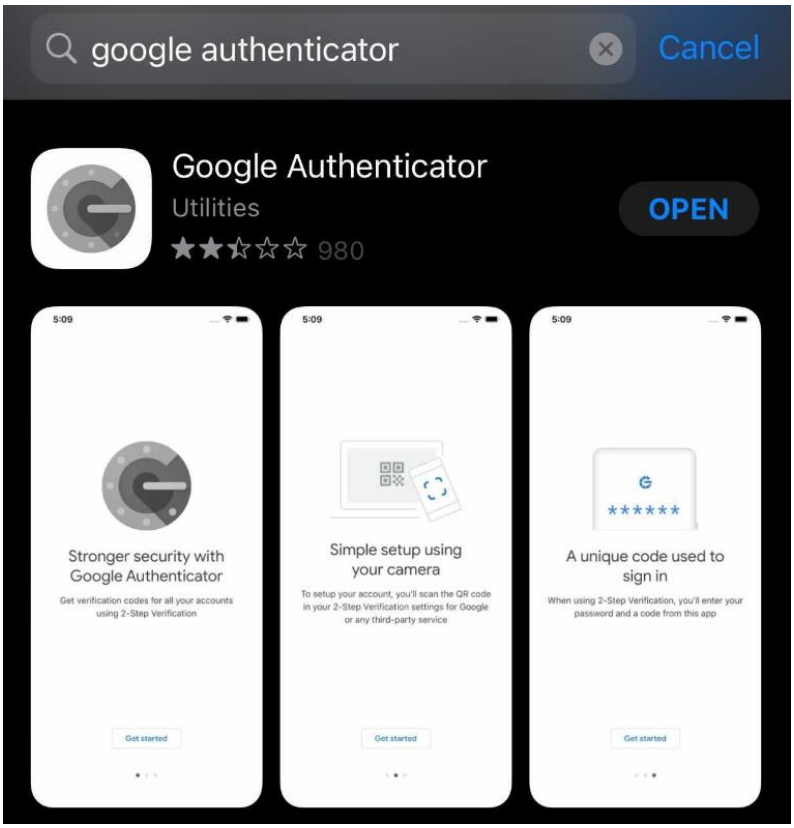
2. Go to vpn.clearoneadvantage.com and select “Sign in with Azure”



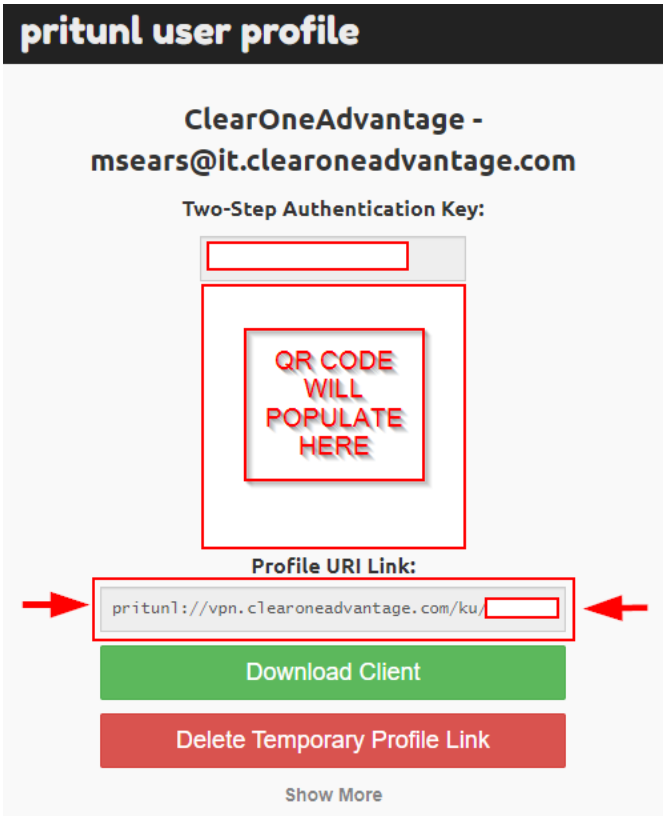
3. Sign in using your Teams email and the same password you used to login to AWS. You should see a screen similar to the one below. (Areas blanked out intentionally)



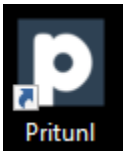
4. Once signed into the vpn site- Open your cell phones app or google play store and search/download “Google Authenticator”



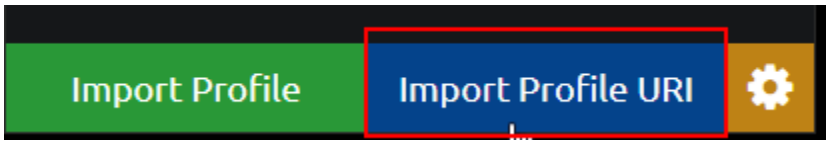
5. Open the Google Authenticator app and go through the initial setup, once you do you will be prompted to scan a QR code
6. Once your prompted, scan the QR code from vpn.clearoneadvantage.com
7. After scanning you will see a 6 digit code populate, this code is the code you will need to connect to the VPN and <u>will</u> change every 30 seconds (for security purposes).
8. Copy the profile URI link from vpn.clearoneadvantage.com by either right clicking or using ctrl + C.



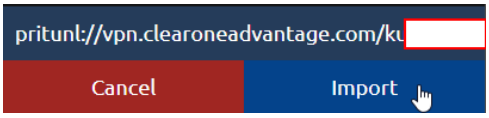
9. Open Pritunl



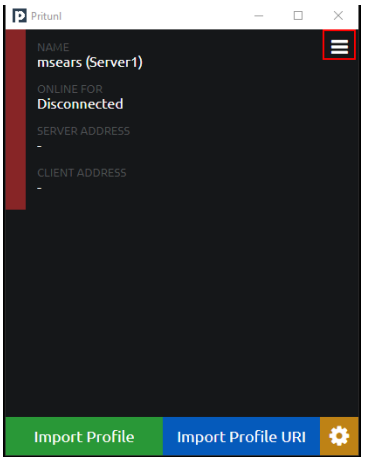
10. Select “Import Profile URI”



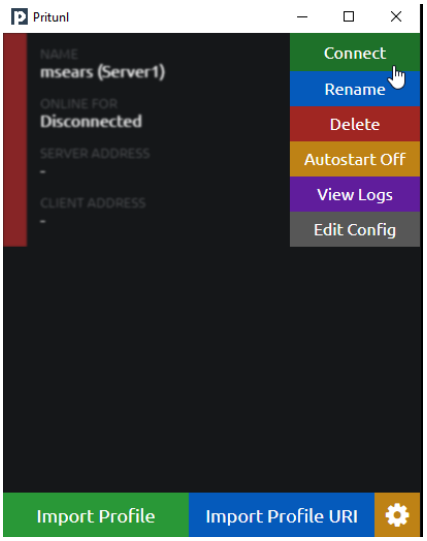
11. Paste the URI link you copied from the vpn site by using the Ctrl + V keys, then click “Import” (If you get an error when attempting to import, refresh vpn.clearonadvantage.com and copy the new URI that populates)



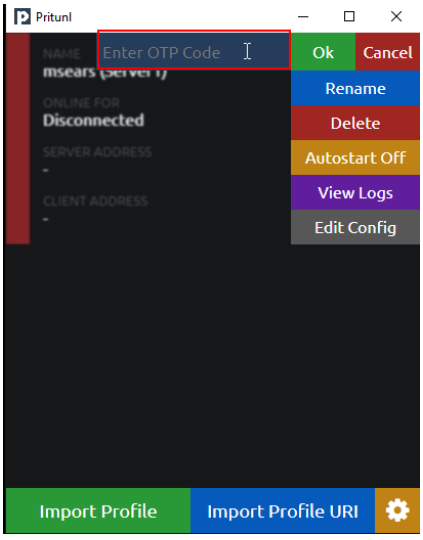
12. Select the 3 white bars at the top right of Pritunl



13. Click Connect



14. Open the google authenticator app on your cell and input the code that's there in Pritunl where it says "Enter OTP Code" (do NOT include a space). Then click Ok



You can verify that you are connected by checking the "Online for" timer
