

## How to setup your new PC

1. Open the box containing your new computer.

2. Inside you will see a keyboard, mouse, computer, and power cable for the computer.

3. Connect the power adapter and plug into the computer.

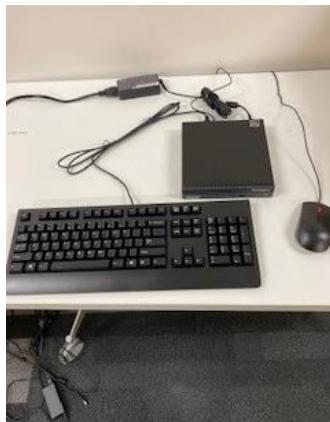

4. Plug power cable into nearest outlet.

5. Plug mouse & keyboard into the back of the PC

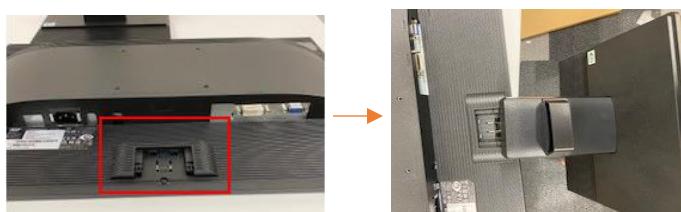

*(This is what your setup should look like so far):*

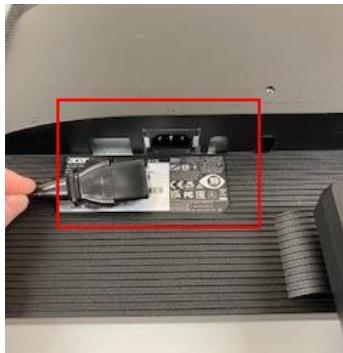

6. Open the box containing your monitor, it will include a power and VGA cable.

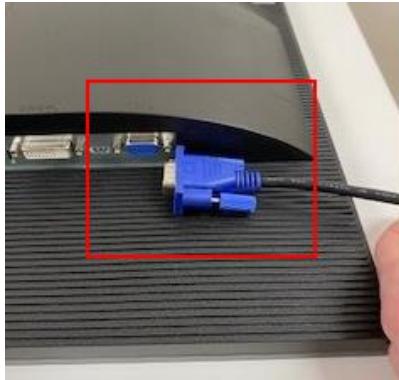

7. Connect the base and insert stand into back of monitor.

8. Plug the power cable into the back of the monitor. (Make sure its secure)

- 
9. Plug the blue VGA cable into the blue port on the back of the monitor. (Make sure its secure)

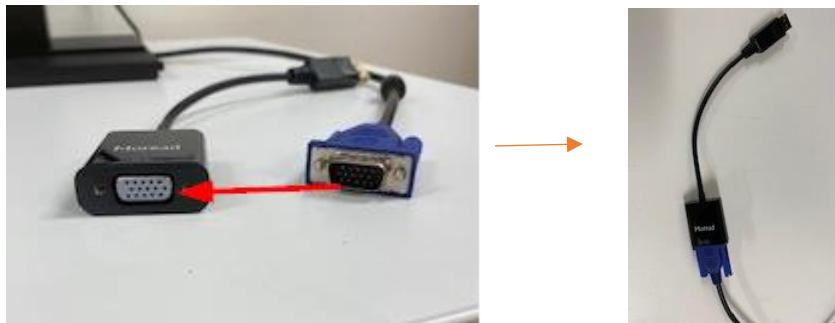

---

This is what the back of your monitor should now look like:

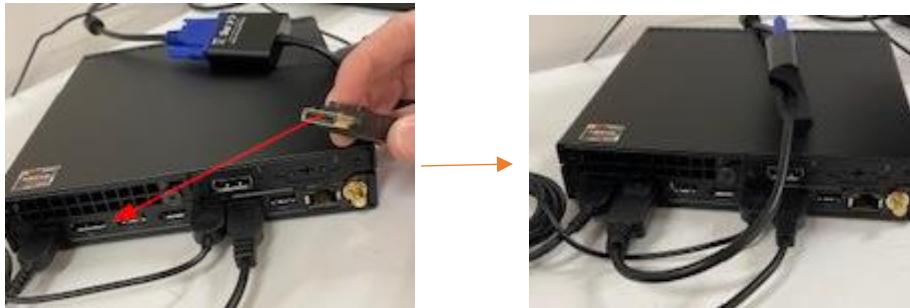

- 
10. Attach your VGA adapter to the other end of the VGA cable.

11. Plug the monitor power cable into the nearest outlet.

12. Plug the VGA adapter into the correct port on the back of your PC.

This is what your setup should look like after completing

13. Once your monitor is connected, power on the pc and follow setup instructions:
