

## Which adapter will you need

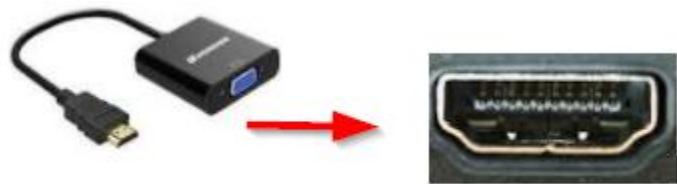

If you received a 2<sup>nd</sup> monitor from COA, it will have a VGA cable included. This is what plugs into the back of the monitor itself along with the power cord.

In order to connect this to your computer you will more than likely need one of the following adapters. You will be able to tell which you need by comparing the ports on your pc.

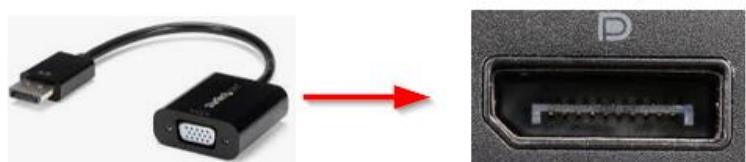

VGA to HDMI

Port

VGA to DisplayPort

Port

USB to VGA (Use only if you do not have an option for HDMI or DisplayPort)

If you have a Mac, you will need one of the following

Lightning to VGA

USB-C to VGA
